The site of the former Repatriation Hospital is of significant community interest and value. ACH Group understands and recognises this and as the new owner of the site is commencing the process to develop a master plan to guide its transformation to a health and wellbeing precinct.

This new health and wellbeing precinct will incorporate health facilities and residential living complexes surrounded by gardens and cafes, where the combination of services and activities will provide a unique living experience and a vibrant destination for workers, residents and the wider community.

Smart technology and innovation will work in harmony with the site’s rich history and heritage, delivering a strong sense of place and building a community where older people, younger people and veterans can come together.

**ACH Group invites your input to assist with the development of the master plan.**

At the community day, a range of activities will be provided to gather your ideas and staff will be on hand to answer questions and discuss your input.
